Luc **Blassel**
Researcher - Machine Learning for Biology and Evolution

✉ luc@lucblassel.com ⌂ lucblassel.com

◎ Paris, France

Passionate about machine learning applied to biological problems, I did a PhD at the Institut Pasteur in Paris. I am currently a post-doctoral reseacher using deep attention networks to study evolution.

Experience

Post-Doctoral Researcher, CNRS, Paris, France   2023–
During this postdoc I will work on the PhyloFormer project with Laurent Jacob and members of the LBBE in Lyon. I am working on improving performance of the model as well as it's generalisation. Extensions to the model are planned, such as taking unaligned sequences as input and including a differentiable tree-building step in an end-to-end pipeline.

Doctoral candidate, Institut Pasteur, Paris, France   2020–2023
PhD in computational biology, focused on improving and learning from sequence alignments. With the ever growing quantity of high quality sequencing data, we are now able to develop methods to take advantage of this data. My PhD project followed 2 different axes: (1) Using machine learning to discover Drug resistance mutations in HIV (Continuation of the M.Sc project) (2) Search of a function space for sequence transformation functions that improve sequence mapping and alignment.
This PhD was supervized by Rayan Chikhi and funded by the PRAIRIE institute. The manuscript can be found here

Research Engineer, Institut Pasteur, Paris, France   2018–2020
Using machine learning and large datasets to explore the drug resistance landscape in HIV. Supervized by Olivier Gascuel. A large dataset of UK HIV sequences associated with patient RT-treatment status was used to train several machine learning algorithms. Examining the importatnt learned features gave us insight in mutations associated to ART failure. This project resulted in a publication.
Project page here, and M.Sc thesis (in french).

Data Scientist Intern, CapitalData, Paris, France   Mar-Sept 2017
As a data scientist intern at Capital data I was tasked with developing a software pipeline to validate data prior to database integration, and detect anomalies usign time series. This was implemented in R and Python. I also, developed reporting-oriented data visualizations of KPIs using BIME and Tableau. Finally statistical AB-testing was also done using python.

Teaching and tutoring, self-employed, Paris, France   2015–2022
Since the beginning of my higher education, I have beedn tutoring middle school, high school and university students in scientific subjects, mainly mathematics. The aim is to turn the students into independents people, more confident in their abilities and more knowledgeable in order to excel in their respective studies.
Since Septemeber 2021, I have been doing oral examination in English for PCSI preparatory class students as the ENCPB in Paris, France.

Education

Doctorate (PhD), Sorbonne Université, Paris, France   2020–2022
Worked at the Institut Pasteur on machine learning techniques applied to biological sequence alignments.

Masters of Science (MSc), Dauphine université, Paris, France   2017–2018
during the IASD program, I followed courses in Deep learning, reinforcement learning, statistical modelling, software engineering and data science. This was a double curriculum with the AgroParisTech IODAA program.

Diplôme d'Ingénieur, AgroParisTech, Paris, France   2014–2018
The first two years of this programm are focused on biology with courses in molecular biology, ecology, health, epidemiology and statistics.
During the final year, I followed the IODAA program, which was done as a double curriculum with Duaphine université, studying machine learning, data science and statistical modelling with a focus on biological problems.

BCPST Preparatory class, École Saint-Hilaire, Paris, France 2012–2014
2 year French preparatory class to prepare a nationally ranked exam for entry in the "Grande Écoles"
ranked 201/1967 (Veto), ranked 481/2991 (Agro)

Journal articles

Phyloformer: Fast, accurate and versatile phylogenetic reconstruction with deep neural networks
Luca Nesterenko [f], **Luc Blassel** [f], Philippe Veber, Bastien Boussau, Laurent Jacob
Molecular Biology and Evolution, msaf051
DOI: 10.1093/molbev/msaf051

Mapping-friendly sequence reductions: Going beyond homopolymer compression
Luc Blassel, Paul Medvedev, Rayan Chikhi
iScience 25.11, p. 105305
DOI: 10.1016/j.isci.2022.105305

Using Machine Learning and Big Data to Explore the Drug Resistance Landscape in HIV
Luc Blassel, Anna Tostevin, Christian Julian Villabona-Arenas, Martine Peeters, Stéphane Hué, Olivier Gascuel
PLOS Computational Biology 17.8, e1008873
DOI: 10.1371/journal.pcbi.1008873

Drug Resistance Mutations in HIV: New Bioinformatics Approaches and Challenges
Luc Blassel [f], Anna Zhukova [f], Christian J Villabona-Arenas, Katherine E Atkins, Stéphane Hué, Olivier Gascuel
Current Opinion in Virology 51, pp. 56–64
DOI: 10.1016/j.coviro.2021.09.009

Origin, Evolution and Global Spread of SARS-CoV-2
Anna Zhukova, **Luc Blassel**, Frédéric Lemoine, Marie Morel, Jakub Voznica, Olivier Gascuel
Comptes Rendus. Biologies 344.1, pp. 57–75
DOI: 10.5802/crbiol.29

COVID-Align: accurate online alignment of hCoV-19 genomes using a profile HMM
Frédéric Lemoine, **Luc Blassel**, Jakub Voznica, Olivier Gascuel
Bioinformatics (btaa871)
DOI: 10.1093/bioinformatics/btaa871
